DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 21 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 and 2 of U.S. Patent No. 6,361,862. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both disclose a rayon fiber, possessing a composite crystalline structure of cellulose II and IV, which is prepared by saponifying 75% or greater of the total acetyl groups of a cellulose acetate fiber with a degree of substitution from 2.0.

The instant claim and the reference differ in that the one is claimed as a rayon fiber product, the other as a rayon fiber. It is the examiners position that the materials are identical and there is nothing in the claims to distinguish them. Furthermore, it is the examiner's position that a fiber, fiber product, fiber composition or fiber material claimed with the same limitation would be the same.

Art Unit: 1751

The instant claims would have been obvious over the cited reference at the time of the invention and would unjustified or improper timewise extension of the "right to exclude" granted by a patent.

Allowable Subject Matter

Claims 7-20 and 22-36 allowed.

The following is an examiner's statement of reasons for allowance: None of the cited references disclose a rayon film and a method for making a rayon film and fiber, possessing a composite crystalline structure of cellulose II and IV, which is prepared by saponifying 75% or greater of the total acetyl groups of a cellulose acetate fiber with a degree of substitution from 2.0. Here, a film is structurally different than the fiber claimed in the parent application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
